- Development Tools: Visual Studio, Microsoft Access

About me

I am a fourth-year undergraduate student pursuing a Bachelor of Science in Information Technology (BSIT). With a solid foundation in software development, cloud computing, and problem-solving, I am eager to learn and utilize technology to create innovative and efficient solutions. I aspire to contribute to dynamic teams and projects where I can further enhance my skills and add value.

Projects and Research

Leveraging mHealth to Streamline Community Care in Health Center 2024-2025

Developing a mobile app to digitize patient records, streamline processes, and improve healthcare efficiency at San Cristobal Healthcare Center.

Rock, Paper, Scissors 2023-2024

Developed an interactive Rock-Paper-Scissors game using IoT components (breadboard and buttons) and C# for the user interface, combining hardware and software for an engaging experience.

Theme Park Ticketing System 2022- 2023

Designed and developed a web-based ticketing system for a theme park using C# for the user interface and Microsoft Access for the database, streamlining customer transactions and data management.
